

## Aerial photography and video

CASA Certified and Insured  
CASA.UOC.0010

Videos and photos captured using UAVs (Unmanned Aerial Vehicles and also known as drones) are a cost-effective way of getting aerial footage without hiring expensive helicopters or cherry pickers. We use high resolution cameras to get excellent aerial images that can be used for advertising, promotional needs or building inspection.

Aerial photography provides detail not easily seen at ground level. This can be of assistance to many industries, from showcasing real estate properties to providing evidence for insurance claims, asset inspections and monitoring of agriculture.

We would be pleased to come and meet you for an obligation-free discussion on our UAV service. Please call Aerial Mission on 0402 467 114 or 0416 140 962 to get things started.

**Uwe Musebrink**  
UAV Pilot  
Aerial Mission Pty Ltd

### About your pilot

Uwe (pronounced Oova) has been interested in “all things that fly” since he was 12 years old when he used to help his uncle fly his model gliders in Germany.

Since migrating to Australia about eight years ago, he continued his love of fixed wing aircrafts and successfully earned his bronze and gold wings with the Victorian Model Aeronautical Association (VMAA).

He quickly became interested in multi-rotors and saw the positive benefits and uses for a wide range of services and industries.

Uwe uses several different multi-rotors and is the manufacturer of one of his own UAVs.

He is registered with CASA as a certified controller and operator which allows him to fly UAVs in Australia.
